Summary

Bureau Score Result

Relative Risk: -5.26 times worse than Veda Advantage average.

Key Contributing Factors

Defaults recorded	Greatly Increases Risk
Number of Enquiries	Moderately Increases Risk
History of type of Credit sought	Marginally Increases Risk
Time Since Incorporation	Marginally Decreases Risk

Explanation of Key Contributing Factors

Shopping Patterns: The type and frequency of credit applications can impact the risk assessment. Research shows that organisations with higher credit risk typically shop around more (and more often).

Company Information: Information about company - the number and the age of director(s), industry characteristics, time since incorporation and security information can be all indicative of increased / reduced risk.

Age of File & Pattern of Enquiries: The spread of credit activity as it relates to the age of the company will impact risk assessment

Industry Characteristics: Research shows that risk is related to the type of credit provider being approached

Director Derogatory Information recorded: The existence of derogatory information (court judgments, bankruptcies, defaults, external administration segments) on the Director(s) file is a very powerful indicator of increased risk.

Default Information recorded: The existence of derogatory information (court judgments, defaults, external administration segments) on the Company file is a very powerful indicator of increased risk.

Court Writ Information recorded: The existence of court writ information on the Company file is a powerful indicator of increased risk.

Bureau scores use available Veda Advantage bureau data to calculate a risk estimate. The primary purpose of the scores is to predict the likelihood of a future adverse event being recorded in the Company's Veda Advantage bureau file.

A score is a statistical rank ordering tool only and as such should always be used in conjunction with your organisation's credit policies and procedures and other relevant information you may have about the company or business.

A score should not be and is not intended to be the sole basis for making a decision about whether or not to deal with a particular company or business.

About The Credit Score

This application has been scored using the Company/Business scorecard and is compared with the Veda Advantage sub population. The odds of recording an adverse with Veda Advantage within 12-24 months of a Veda Advantage enquiry is 16:1
